

All our Schools adopt the same approach to social networking.

We believe that:

Children must abide by age restrictions relating to internet information sharing sites;

All parents/guardians should support us in the development of safe practice;

Where a school needs to investigate inappropriate use of social networking, parents should give us their full support. This includes agreeing to us viewing the site;

Where necessary, incidents will be reported to the appropriate authority;

We should develop in students an awareness of e-safety rules that explain how individuals can protect themselves against cyber bullying and other internet misuse.
